

TITTLE: Nyabondo HIV/AIDS patient support centre.

Name: Isaac otieno rachuonyo.

Contact: leoiar@yahoo.com

Organization: St. josephs' mission hospital nyabondo.

Introduction:

St. Joseph's Mission hospital Nyabondo was started in the year 1909 under the sponsor ship of st. Joseph's Catholic church of Nyabondo. This was the brain-child of the late Rev. Fr Leo wuod Atieno. The hospital is situated in Nyanza province nyando district along kisumu-kisii highway. The PLWHA project was started after we noticed that the local community were not aware of the prevalence of HIV/AIDS. We provide home based care to PLWHA, Voluntary counselling and Testing services, PMTCT services to pregnant Mothers, we also offer some HIV/AIDS awareness seminars to help in creation in informing the people about the importance of knowing their HIV status early. All these services we offer in line with regulations and standards of NACC and NASCOP and we also some times work in collaboration with other local CBOs.

GOAL:

- To create HIV/AIDS among the local community.

-

OBJECTIVES:

- To train all people within the locality that HIV/AIDS is real but not a customary belief.
- To reduce mortality rate within the area.

Out-put	Activities	Responsibility	time frame	indicator	Budget (\$)	Source of funds
A network of stake-holders and health worker formed.	-Establish HIV/AIDS committee. -Add a policy and implement the component of care and treatment of PLHWA.	-Stake-holders and health staffs. -HIV/AIDS Program manager.	1 st Q 2 nd Q	-number of people recorded. -total reduction in mortality rate.	\$2,000.00	NACC.
