

NATIONAL HIV/AIDS RESEARCH INVENTORY

Tanzania Commission for AIDS (TACAIDS) is in the process of establishing National HIV and AIDS research inventory for both medical and non medical researches. The inventory will provide valuable information for planning and informed decision making for HIV and AIDS programme improvement, it will as well provide useful information for general public at large.

The Commission will use all appropriate dissemination channels such as website, reports, and brochures to mention few, to ensure the inventory is accessible to all stakeholders.

Based on the above facts, the Commission call for all research institutions, academic institutions and individuals doing researches to support this initiative by submitting published, not published and ongoing researches for inclusion in the inventory.
